DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1, 5, 9, 10, 13-20, and 28-31, drawn to compositions of BMPs and cells, classified in class 530, subclass 350, and class 435, subclass 325.
- II. Claims 2-4, 6-8, 11, 12, and 21-27, drawn to methods of treatment using BMPs and cells, classified in class 424, subclasses 93.7 and 198.1.

The Examiner notes that claim 12 currently depends from itself.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the BMPs and cells of invention I have other uses, such as bone regeneration, and the methods of invention II can be practiced with other agents, such as TGF- β and chondrocytes.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Art Unit: 1646

Because these inventions are distinct for the reasons given above and the search required for Group II is not required for Group I, restriction for examination purposes as indicated is proper.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
